INSTRUCTIONS TO NEW MAIL BIDDERS

Bidding by mail permits you to participate in an auction as though you were attending it in person. The procedure is really quite simple. You tell us what you want, and the maximum amount you are willing to pay. We then, as your personal agent, try to buy the items listed for you at the lowest possible price.

The enclosed mail bid form has two sides for you to fill in. The front side provides all the information we will need to register you as a bidder, execute your bids for you and deliver your lots to you if you are a successful bidder. Please answer all the questions that may apply to you. If you have any special mailing instructions or and/or other instructions, please note them in the "special instructions" are of your bidsheet. **DON'T FORGET TO SIGN YOUR BIDSHEET.**

LOT	BID
#8	\$350
#10	\$500
#18	\$600
#133	\$700

On the back side are pairs of columns where you may list your bids. After carefully reading the lot description, write down the lot number and the maximum amount you are willing to pay for that lot. Don't forget that a 15% buyer's fee will be added to your actual purchase price if you are the lucky bidder. Continue to list lot numbers and bids for each of the lots you are interested in buying.

When we receive your bidsheet, we will record your bids at the amount you have authorized us to bid for you, and we will, in addition, note any lots where an increase is authorized if absolutely needed to win the lot. For example, if the sample bidsheet shown at the right were yours, we would enter your bid on lot #8 as \$350. If yours was the highest bid received, you would be the purchaser at \$350 (plus 15%), and applicable taxes and shipping charges. If the second highest bid received on the lot was substantially less, your bid would be reduced to a "normal" increment above the second-highest bid, just as it would be if you were present at the sale yourself to execute your own bids. If you have authorized a percentage increase on the front side of your bidsheet and the bidding by others has exceeded your basic bid, we will then, as your personal agent, increase your bid to the minimum amount necessary to obtain the lot for you. The authorized increase will never be used except when your basic bid is exceeded.

Before you mail your bidsheet, do be sure to check it over to make certain you have bid on the correct lot(s) and that your bids are the ones you are both willing and able to pay for. Enjoy the catalog, place bids on everything you would like to buy. If time is running out and you feel your bidsheet may arrive too late to be included, you may call our office between the hours of 9:00 a.m. and 5:00 p.m. Monday through Friday, giving us the lot numbers and amount you will pay for each lot, over the telephone. Please make sure you immediately send in your bidsheet for confirmation. Also, you may FAX your bidsheet to us. As your personal agents we wish you every success.

VIEWING OF LOTS

Lots will be available for viewing by prospective bidders at our office each day, Monday through Friday, by **APPOINTMENT ONLY**, between the hours of 9:00 a.m. and 5:00 p.m. October 28, 2002 through November 14, 2002 only.

"The Coinage of Mexico Struck During the Reign of Charles and Johanna"

New finds reassigning the chronology of assayers.
by Kent Ponterio

Early Series (without waterlines)

The decree to establish a Mint in Mexico City was written on May 11, 1535 however the officials did not arrive in Mexico until November 14, 1535 and the first coins were struck in April of 1536.

1) The first assayer at the Mexico City mint was Assayer "R" (Francisco Del Rincon) who struck coins between the years of 1536 and 1538. The office of assayer at this time was only a two-year lease.

- a. Dating the coins of Rincon is much easier than most of the assayers in this series. When the Mexico City mint opened in April of 1536 they were only authorized to strike coins in the denominations of 1/4, 1/2, 1, 2 and 3 Reales. On November 18, 1537 the minting of 3 Reales ceased and was succeeded by a decree authorizing the minting of 4 and 8 Reales.
- b. Denominations and dates for this assayer:

1/4 Real	(1536-1538)
1/2 Real	(1536-1538)
1 Real	(1536-1538)
2 Reales	(1536-1538)
3 Reales	(1536-1537)
4 Reales	(1538)
8 Reales	(1538)

Gothic R
Assayer Mark

2) The second assayer in the early series is the assayer with the initial "P". The name of this assayer and the exact dates when the coins were struck are unknown. It could possibly be Pedro de Espina or Pedro de la Membrilla whose names appear on several documents pertaining to this subject.

- a. It is known as a fact through die linking that "P" was the second assayer. The first emission of coins from assayer "P" was all struck from reworked dies of the previous assayer. They all appear with Assayer "P's" initial repunched over "R" (photo below). When Francisco del Rincon's lease on the office of assayer was up he wished to have his lease reinstated for another term. The owner of the office refused to reinstate the lease for reasons of favoritism. The dies for coining were kept in a locked box for which there were two separate locks with two separate keys. The assayer of the mint had access to one of the keys. A different official at the mint kept the other. When Francisco Del Rincon left the mint he would have been able to take the punches used to make dies with him but would not be allowed to take the already prepared dies. This would explain why old dies were used for a very brief period of time and then new dies made from entirely new punches came into use.
- b. Dating the coins of assayer "P" is somewhat more complicated than that of the previous assayer. Assayer "P" began striking coins sometime in 1538. It is uncertain as to exactly when his responsibilities as assayer ceased. It is however certain that he did hold this position for some period of time, at least the two-year term of the lease if not longer. Out of the four assayers in the early series this assayer is the most frequently encountered. Also there are more known dies for this assayer than the other three early series assayers put together.

c. Denominations and dates for this assayer:

1/4 Real	(1538-1540 or 1541)
1/2 Real	(1538-1540 or 1541)
1 Real	(1538-1540 or 1541)
2 Reales	(1538-1540 or 1541)
4 Reales	(1538-1540 or 1541)

3) The third assayer in the early series is the assayer with the initial "F". The name of this assayer and the exact date when the coins were struck are unknown. It could possibly be Francisco de Loaysa or Esteban Franco whose names appear on several documents pertaining to this subject.

- a. There is very little known about this assayer. Coins of this assayer are anywhere from rare too extremely rare. There were only a few sets of dies used to strike coins during his term as assayer, which would suggest a very short term in office. It is likely that this individual took over the job of assayer to be a temporary replacement until the position could be permanently filled. Or for some reason this assayer's term was cut short. Data points towards coins being struck some time in 1540 or 1541.
- b. Most of dies used to strike the coins of this assayer are reworked dies from the previous assayer and very few new dies were prepared.
- c. One other possibility to the identity of this assayer although no evidence points to this would be Francisco Rodriguez the individual who was assayer for the mint in Santo Domingo.
- d. Denominations and dates for this assayer:

1/4 Real	(1540 or 1541?)
1/2 Real	(1540 or 1541?)
1 Real	(1540 or 1541?)
2 Reales	(1540 or 1541?)
4 Reales	(1540 or 1541?)

4) The fourth and final assayer in the early series. Assayer "G" (Juan Gutierrez).

- a. This individual held multiple terms as assayer in both the early and late series. Previously this was thought to be the second assayer in the series but recent evidence of die linking (photo below) and documentation have proved otherwise.
- b. The exact date for when Gutierrez began minting coins is not known. He renewed his two-year lease in 1543, which would probably make the date of his original lease some time in 1541.
- c. During the office of this assayer the transition from early series to late series took place. This transition probably took place in 1542 when new punches to prepare dies arrived from Spain.
- d. During his office as assayer copper Maravedis were introduced for the first time in 1542.
- e. Denominations and dates for this assayer:

2 Maravedis	(1542)
4 Maravedis	(1542)
1/2 Real	(1541-1542)
1 Real	(1541-1542)
2 Reales	(1541-1542)
4 Reales	(1541-1542)

Late Series (with waterlines)

1) The first assayer in the late series. Assayer "G" (Juan Gutierrez).

- a. New punches arrived from Spain in 1542 marking the end of the early series and the birth of the late series. Note that none of the old punches are muled with the new punches. All of the first coins of Gutierrez in the late series bear the king's name spelled with a "CH". Also the first issues of assayer "G" bear a small "o" above and below both the mintmark and assayer's mark; a characteristic of early series coinage. This piece is a transitional type from the early series to the late series. Assayer "G" is the only assayer to have this characteristic. Another interesting fact on the coins of assayer "G" is the use of the "Mo" (Mexico City mintmark), that appears for the first time in the manner that it is still used.
- b. The first emissions of assayer "G" are on smaller planchets or modules. Much resembles planchets of the early series coinage.
- c. On January 17th 1543 Juan Gutierrez signed his second two-year lease for the office of assayer. However there was a brief interruption in his lease. On March 21st 1543 Francisco Del Rincon (first assayer in the early series) swindled his way in into purchasing the position for 550 Pesos of Gold De Minas from Pedro de la Membrilla who was rightful owner of the position and the person who leased it out. This gave Rincon a very brief period of minting coins in the late series that ended in a lawsuit. After de la Membrilla realized that he had been cheated and the office was purchased for a fraction of its actual value he resigned a lease with Gutierrez on August 1st 1543 and proceeded to file a lawsuit against Rincon on September 29th 1543. The eventual outcome was de la Membrilla leasing the office back to Gutierrez on April 22nd 1544 for 1500 Pesos of Gold De Minas. It should be noted that there are a few examples of coins that are struck with the assayers mark "G" punched over an "R".
- d. This assayer marked the peak of quality for the series. The finest style and execution of coins were struck under this assayer. Many of the coins of this assayer are struck on a full round planchet with full legends and a nice deep strike. I attribute the coins of this quality to the year 1545. In that year the "Tello de Sandoval Investigation" was conducted. This was a full mint investigation that spanned several months and is one of the most important documents pertaining to this period of Mexican numismatics. All of the workers at the mint were being closely watched and interviewed. What better reason to make sure that the coins came out perfectly than not only your job being on the line but possibly your life.
- e. Denominations and dates for this assayer:

2 Maravedis	(1542-1543) again (1544)
4 Maravedis	(1542-1543) again (1544-1545)
1/4 Real	(1542-1543) again (1544-1545)
1/2 Real	(1542-1543) again (1544-1545)
1 Real	(1542-1543) again (1544-1545)
2 Reales	(1542-1543) again (1544-1545)
4 Reales	(1542-1543) again (1544-1545)

2) The second assayer in the late series. Assayer "R" (Francisco Del Rincon).

- a. This assayer struck coins for only a very brief period of time. Judging from the date he purchased his lease and the date where he was brought to court, he could have only struck coins some time between 1543 and 1544. The longest period of time he could have held the position of assayer is approximately 13 months. It is however unlikely that he minted coins for the entire 13 months since he had to return to Spain to endure a lawsuit brought forth by Pedro De La Membrilla. Please see subparagraph "b" of the previous assayer for a better explanation).
- b. It is possible that some of the late series copper Maravedis were struck under this assayer. However this is impossible to confirm or deny especially considering they bear no assayer's mark.
- c. None of this assayer's coins bear the mintmark with a small "o" above it.
- d. Denominations and dates for this assayer:

1 Real	(1543-1544)
2 Reales	(1543-1544)
4 Reales	(1543-1544)

3) The third assayer in the late series. Assayer "A" (Alonso del Villaseca).

- a. In a lease agreement between Juan Gutierrez and Pedro De La Membrilla dated 1543 Gutierrez signed a lease for the office where it states for a time and space of two full years as principal trustee. It also states that Alonso Del Villaseca will be his trustee. In this document it also states that Villaseca will have leased the office but it does not disclose a date. This document was renewed and resigned after a deposit was made on the office in 1544 following a string of interfering events by Francisco Del Rincon (see subparagraph b. under Gutierrez.) Judging from the fact that Gutierrez was still assayer during the Sandoval Investigation in 1545 and that his two year lease would have expired in 1546 points towards Villaseca minting coins either in 1546 or 1547.
- b. It is uncertain as to how long Villaseca held his term as assayer. Several facts point toward it being a very brief period of time. The first is the rarity of the coins. When Robert Nesmith wrote ANS monograph No. 131 "The Coinage Of The First Mint Of The Americas At Mexico City" in 1955 he noted only 16 coins out of the over 2400 late series coins that he examined that were assayer "A". Since then more coins have appeared on the market from hoards, shipwreck finds or collections that were unavailable to view for that analysis. Still one must conclude that this assayer struck coins for a much shorter term than a majority of the others in the late series.
- c. Several of the coins that bear the initial "A" are over the initial "G" of Juan Gutierrez. When this assayer took office the dies from the previous assayer were used and repunched rather than preparing new dies. Also many of the coins examined of this assayer are struck from the same dies. All of the assayers that are more common have many sets of dies. For instance one could make a very large collection of just the coins of assayer G, L or O by die. This is not the case for assayer "A".

d. Denominations and dates for this assayer:

1/2 Real	(1545 or 1546?)
1 Real	(1545 or 1546?)
2 Reales	(1545 or 1546?)
4 Reales	(1545 or 1546?)

4) The fourth assayer in the late series. Assayer "L".

- a. This assayer has been documented in several publications as having been Luis Rodriguez. This attribution comes from a letter to Spain dated 1570 informing the Council of the Indies of this individual's death. This is however a highly unlikely candidate for various reasons. The first being the vast presence and variety of coins minted under assayer "L" that were present on the Padre Islands shipwrecks which sank in 1553. Another factor that makes it highly unlikely is that the mint in Lima Peru was already striking coins with the name of Philip II two years prior to 1570. In 1556 Charles I abdicated the throne to his son Philip II. It is very doubtful this individual was still striking coins 14 years into the reign of a new king. Typically posthumous issues extended a year, maybe two into the reign of the new king, usually only long enough for the news to reach the New World and the time it took to make new dies. In Pellicer they list this assayer as "Luis Gutierrez". This may be a possibility but I have yet to see any documentation that proves this either.
- b. It is important to note that the coins of assayer "L" that were recovered from the wrecks of the 1553 fleet all bear the mint mark as a plain "M". They are all of good style and on round planchets. The coins of assayer "L" that are struck on small compact planchets are not completely round. The majority bear the mint mark "Mo" and come later in the series. None of these were present on the Padre Islands wreck or in another hoard that was discovered recently. The "Mo" mintmark and the deterioration of style takes place during the brief intervention of assayer "S" which directly follows these coins. Even though the coins of "L" that bear the mint mark as a plain "M" are more common than the coins with the "Mo" they tend to bring more because the quality and style is better.
- c. The first coins minted under this assayer are struck from dies of the previous assayer. The "L" assayer mark is punched over an "A"
- d. Even though this assayer put out a very large mintage of coins dating the coins of this assayer is virtually impossible at this point. Not enough documentation has come to light as of yet to narrow down any closer than some time before 1553.
- e. Denominations and dates for this assayer:

1/2 Real	(154?-1552 or 1553)
1 Real	(154?-1552 or 1553)
2 Reales	(154?-1552 or 1553)
4 Reales	(154?-1552 or 1553)

5) The fifth assayer in the late series. Assayer "S".

- a. Much like the last assayer very little is known of this individual. Most of what we can gather is from hoard and shipwreck evidence. Published in "Glosario De Maestros De Ceca Y Ensayadores" as being Gomez de Santillan but like the previous assayer I have not seen documentation that proves this. We do know that this individual struck coins around or slightly before the year 1553 from the hoard evidence present on the Padre Islands shipwrecks.
- b. This assayer's coins come with both the M and Mo mintmark. The first coins struck by this assayer bear the mint mark as M. The remainder of this issue bear the mint mark as Mo.
- c. This individual obviously held the office for a very brief period of time due to the rarity of coins bearing the initial "S" and the minimal amount of dies that have been documented. When Robert Nesmith wrote ANS monograph No. 131 "The Coinage of the First Mint of the Americas at Mexico City" in 1955 he noted only 12 coins out of the over 2400 late series coins that he examined that were assayer "S". One must however take into account that this book was written before the discovery of the Padre Islands Shipwrecks. Which is where most of the heavily corroded examples that appear on the mark from time to time were discovered.
- d. Denominations and dates for this assayer:

1/4 Real	(ca. 1553)
1/2 Real	(ca. 1553)
1 Real	(ca. 1553)
2 Reales	(ca. 1553)
4 Reales	(ca. 1553)

6) The sixth assayer in the late series. Assayer "L".

- a. Possibly and quite probably the same individual who was the fourth assayer with the brief interruption by the previous assayer for reasons as yet unknown.
- b. Examples have been noted struck from dies of the previous assayer. The "L" assayer mark is punched over an "S".
- c. Examples have been noted struck from dies of the following assayer. The "L" assayer mark is punched over an "O".
- d. Most of this issue bears the mintmark as Mo and are of much less refined style than the earlier coins that bear this initial. Also the planchets are not as well manufactured, often uneven, thicker and not as well rounded.

- e. One very important and some times confusing point about this assayer is the fact that many of the coins are repunched from dies of assayer "O". Assayer "O" is obviously the last assayer in the series since the first coinage of Philip II all bear the initials of this assayer. On a similar note many of the coins of assayer "O" are reused dies of assayer "L". Overassayers exist back and forth for both of the last two assayers. The most likely explanation for this is that after assayer "L" had been assayer while Assayer "O" was either working as his apprentice or working side by side with him. It was not all that uncommon for the mint to have multiple assayers in office at the same time. For example the "MF" assayers mark which is present on pillar coinage during and after the reign of Philip V. were the initials of two individuals Manuel de La Peña and Franco de La Peña. In my opinion this is a much more probable explanation of events rather than they continually switched the office back and forth. Coins bearing "L" and coins bearing "O" were probably struck at the same time during one point. When one assayer needed a die it would have been much easier to repunch one letter than prepare a whole new die.
- f. Repunched dies of assayer "O" over "L" and "L" over "O" are the most frequently encountered over assayers in the entire series. There are probably more over assayers of these two varieties than all of the rest combined.
- g. By this time production at the mint had increased immensely. This is evident by the amount of coins remaining from this period at the mint. Another fact that points to the increase in production is the quality and style of the coins becoming much poorer. The mint became much more concerned with quantity of production than quality.
- h. Denominations and dates for this assayer:
- | | |
|----------|-------------------|
| 1/2 Real | (circa 1553-155?) |
| 1 Real | (circa 1553-155?) |
| 2 Reales | (circa 1553-155?) |
| 4 Reales | (circa 1553-155?) |

7) The seventh and final assayer in the late series. Assayer "O".

- a. This is the final assayer in the Charles and Johanna series. And also the first assayer for the following king, Philip II. In the past it has been published that this assayer's coins were struck up until the year 1572. This is however very unlikely for several reasons. The first being as far as I know posthumous issues typically only extended one or two years into the reign of the new ruler. Philip II ascended the throne in 1556 and would wanted his name as the new king in the public's eye as much as possible. It is highly unlikely the coins did not bear his name until 16 years after he became king. Another fact that points against posthumous coins being struck this late would be the fact that a mint had been established in Lima, Peru a few years earlier and was already striking coins under the name of Philip II. I think that assayer "O" probably struck coins up until 1572 but the later ones were with the name of Philip II.
- b. The last coins that bear the name of Charles and Johanna were probably struck in 1557. It is doubtful they would extend much beyond this date. The amount of time it took for word to reach Mexico City and for them to prepare dies for the new king is probably the amount of time, which had elapsed.
- c. Probably apprenticed under or held office at the same time as assayer "L"(see subparagraph "e" under the previous assayer).

d. The quality of coins being produced at this point is by far the poorest quality. Many examples are of uneven strike, uneven planchets, planchet cracks, double strikes and poor quality planchets that resemble those used on the later cob coinage. It is quite apparent that at this point the mint was geared for mass production.
